RE: GREMLIN "SPACE FURY" MONITOR RECALL

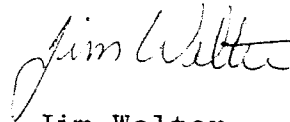

Electrohome is now in the process of drop-shipping replacement Space Fury monitors directly to our locations.

Included with the packing slip will be special instructions on where to return your original monitors.

DO NOT SEND THEM HERE!!!

Follow the instructions and return them to the collection point specified by Electrohome. Please note that all returns will be C.O.D.

Thank you.

Aladdin's Castle® Memo

October 16, 1981

TO: ALL MANAGERS
FROM: TECHNICAL SERVICE DEPARTMENT
RE: SPACE FURY RECALL/MODIFICATION

We have been informed that there is a problem with the new monitor modification.

R635 and R735 have been changed from 1.5 ohm 10W to 3 ohm 10W. The way they did this was to add a resistor in series with the original.

Unfortunately, Gremlin has used the same approach we have come to know and expect from them.

Instead of piggy-backing the resistors they mounted them in a inverted "v" configuration.

Because of this, one lead of the resistor can easily break, especially during the rough handling received during shipment.

If you receive a replacement monitor, please check these resistors for broken leads before powering up the game.

We would like to extend our thanks to Walter "Butch" Spivey for telling us about this problem.

Thank you,

Jim Welter
